**FILLOSHINE**  
just science

# NANO-TOK ATP+

It is an absorption-inducing home-esthetic beauty device that allows 81 needles of high purity silicon chips made with nanotechnology to create microscopic paths that are invisible to the skin so that active ingredients can be delivered more safely and effectively.

Now, please deliver Filloshine's various nutritional solutions to the skin generously without pain, without side effects.

## ✓ ON/OFF, Leven Control button

ON/OFF: Press and hold button  
Leven Control: Short push button

Nanochip 0,2mm

## ✓ NANOCHIP

80nm in diameter,  
1/1000 thickness of hair,  
uniform skin care with constant force

diagonal  
direction

You can use it 2-3 times in the direction  
of the arrow for better results.

# How to use & Precautions

## | How to use |

1. Get fully charged Nanotok Autopen Plus ready.
2. Insert the Nano chip into the screw in front of Nanotok Autopen Plus.  
(Turn clockwise and put it in until the end. After use, turn it in the opposite direction to remove it.)
3. Press and hold the power button to turn it on. (Press the button briefly when converting strength.)
4. After use, press and hold the button to turn off the power.

## | Usage Tip |

1. We recommend that you put the device on the first(soft) level first. When using the machine, it is more effective to draw lines slowly to the side.
2. After using it 3-4 times, we recommend increasing the intensity by one step(normal and High level).  
\* We recommend you to adjust it according to your skin condition.
3. We recommend sufficient moisturizing and intensive nutrition management every morning and evening by using basic products of FILLOSHINE GFP series and FILLOSHINE Multi-Ex series for three days after using Nanotok Autopen Plus.
4. Nanotok Autopen Plus is recommended for evening use(before slepp), and this method is recommended to give your skin take enough rest to bring about better effects.
5. NanoTok Auto Pen Plus allows you to do makeup the next day after use. However, it is recommended that you adjust it according to your skin condition and apply suncream to protect your skin from UV rays.

## | Precaution |

1. Nano chip is disposable 'cosmetics absorption induction' and are prohibited for other purposes.
2. The skin may experience temporary heat, redness, or itching after use.
3. Do not store the Nanotok Autopen Plus in a damp or wet place, Keep away from an infant
4. Do not use on the wound
5. If something goes wrong after use, please stop using and ask a doctor if there's a problem after use.  
If you have sensitive, irritable skin, or severe pimples, it is recommended that you test the back of your hand first and use it after self-testing for skin abnormalities. For skin disease treatment, users of the treatment stage for skin diseases such as using steroid-containing skin ointment are prohibited from using it after consultation with a specialist.

# About FILLOSHINE

---

## | To Inspire Skin Confidence |

### The Bioactive Growth Factors & Biomimetic Peptides for Cosmetics and Cosmeceuticals

One of the biggest causes of skin aging is the reduction and aging of fibroblasts.

Fibroblasts are the main cells of the dermis, and the proteins they produce affect skin elasticity and moisture, including collagen and elastin.

The reduction of these fibroblasts will affect the production of collagen, making the dermis thinner, wrinkled, less elastic and darker.

FILLOSHINE is a combination of growth factors and biomimetic peptides necessary for the human body and skin.

The active ingredients contained in filloshine promotes the regeneration of fibroblasts  
in the dermal layer of the skin and keratinocytes in the epidermal layer.

Improves skin regeneration through a normal 28-day skin metabolic cycle to create the young, healthy and radiant skin.

## | Patents & New Technologies |

Since its foundation in 2005, we have been striving for the development and industrialization of  
bio-active and high-value-added biomaterials for the healthy and beautiful human life.

With passion and efforts for research and development, we are leading the domestic cosmetics and industrial raw materials fields  
based on biotechnology, Skin biology and plant tissue culture technology.

Accumulation of excellent research technology leads to selection of various national projects,  
successfully commercialization of research projects, and has become the top company in Korea  
for the development of cosmetic ingredients and bioactive materials.

We promise to make steady efforts to become the best biotechnology company in the world.

Thank you again to all of our shareholders and employees.

## | Growth Factor With Mechanism |

IntoCell growth factor is different from the previous growth factors, it is the core technology ingredient listed for the first time  
in the International Cosmetic Ingredient Dictionary (ICID) by the Filloshine manufacturing plant.

The research and development of IntoCell growth factor focus on the sperm passing through  
the egg membrane when the sperm and egg are fertilized.

Smaller peptides are attached to the protein existing in the human body to make it easier for the protein to penetrate into the skin.

Compared with previous growth factors, intracellular growth factors possess good skin cell permeability.

It has a synergistic effect with growth factors such as fibroblast growth factor, epidermal growth factor,  
keratinocyte growth factor, etc., regulating skin function, restoring normal skin regeneration cycle.

# FILLOSHINE GFP Series

**#Multi Function # All skin type # Anti-aging**  
**#Filloshine's signature best product #Pink ampoule #Skin boost ampoule**

FILLOSHINE GFP 21.0 product contains growth factors that help normalize the metabolic cycle, regulate skin function, and promote healthy cell growth, thereby achieving growth factors to prevent aging and also peptide components that help skin regeneration and strengthen the skin barrier.

In addition, the phyto-NEP ingredient helps to improve the inflammation of aging skin and restore the skin condition.

Amino acid/vitamin/mineral ingredients help to provide nutrients and the best growth environment for cells.

Finally, hyaluronic acid, a natural moisturizing ingredient, helps the skin replenish moisture, gives moisturizing experience, and makes the skin moist & healthy.

**Main Ingredients : Intocell- Growth Factors, Peptides, Phyto-NEP, Amino acid, Mineral, Vitamin, Hyaluronic acid**

**#Sensitive type # Oily type # Acne type # oily-combination type**  
**# Yellow ampoule # Skin boost # Treat function**

FILLOSHINE GFP AC 10.5 is formulated with low-irritation and skin-friendly ingredients necessary for acne-prone skin which reduces skin irritation. The immune-related cytokines contained in the product have antibacterial and anti-inflammatory effects on acne bacteria, regulating skin balance and helping inhibit the cause of acne. Besides, the cytokines help soothe sensitivity and restore healthy skin's amino acids/vitamins/minerals and natural moisturizing factor hyaluronic acid, creating healthy and smooth skin. Lastly, antioxidant and immune-boosting ingredients help prevent and eliminate skin stress, protecting the skin and making the skin healthier.

**Main Ingredients : Acnobet, Hairen, Hydroxydecyl Ubiquinone, Intocell-aFGF, Intocell PLUS-EGF, TNF- $\alpha$ , IL-10/1b/8/6/2, TRX, IFN- $\gamma$**

**#Lifting & Wrinkle improvement ampoule #Dry type**  
**#Pigmentation type # Skin boost # Treat function**

FILLOSHINE GFP PG 10.5 is formulated with skin-friendly ingredients necessary for pigmented skin. The peptides, growth factors and other ingredients contained in the product induce exfoliation of unnecessary keratinocytes, promote the production of keratinocytes, and restore the normal skin's metabolic cycle. This helps strengthen the skin barrier. In addition, powerful antioxidants that relieve skin pressure and inhibit melanin production can help skin whitening; PDRN and other ingredients that promote skin regeneration can help promote wound healing and prevent scar formation. Lastly, the amino acids/vitamins/minerals and the natural moisturizing factor hyaluronic acid help restore healthy skin, creating healthy, clean & smooth skin.

**Main Ingredients : Intocell IGF-1, NP1/2/3, Oligopeptide-1, Intocell PLUS-EGF, AHP, Glutathione, Collagenpeptide, PDRN**
